Challenges

- The MIMCO INDI-GO-GO order was received when the country was recovering from a severe drought and water scarcity. The period was notable by an acute shortage of supplies such as maize, a staple food in Kenya. Lack of water also led to outbreak of cholera which by July 2017 had claimed more than four lives. Due to the epidemic it was a major concern for many of the artisans working on the order, although no case of shortage of food or death was reported from them. It was evident that with the stable income the artisans were able to stay in good health.
- Kenya was gearing up for the elections to be held on the second week of August 2017. Campaigns were rife at the time of completing the order. This heightened ethnic tension among artisans. Work was therefore an important uniting factor among artisans of different tribal backgrounds.
Income, saving and investment

The workers received a fair and decent wage throughout the order. Many of the artisans were able to *save and invest their earnings into education, health, housing and various other commodities*, increasing their opportunities and contributing towards poverty alleviation.

- 9% of participants stated their income was higher than what they would have otherwise earned from the domestic market.
- 27% of the artisans were able to save however due to high cost of living none were able to invest their income.
- 67% of workers were able to pay all or most of the tuition fees for children.

Skill development

To complete the order, the artisans improved and expanded their *skillsets* and received training. This contributed to their *income-generating prospects*.

- 67% of artisans received training and learnt new skills to complete the MIMCO INDI-GO-GO order.

Health and nutrition

Receiving a regular income enabled artisans to *maintain their health* due to a *regular meal* and *improved medical care access*, subsequently enhancing their *quality of life*.

- 100% of participants were able to provide a regular and healthy meal for their household. 85% of workers stated that they never or rarely skipped a meal, while 6% sometimes or often skipped meals due to inadequacy of food supplies.
- 9% of the participants experienced sickness during the order.
- 100% of the artisans who experienced sickness said they would not have sought the same medical treatment without the income received from the order.

Social well-being

For most artisans, working on the order provided them with a sense of *social well-being* and improved their *life satisfaction*. Not only did the artisans work together to complete the order, but they *worked as a community* to discuss their *daily needs* and *solve pressing social issues*. This *empowered women* and *improved development*, consistent with the aims of EFI.

- 100% of artisans said they felt more confident in their daily tasks and activities as a result of the order.
- 100% of artisans felt proud of the work they had produced.
- 100% of artisans were able to provide for their immediate families with the income from the order.
- The MIMCO INDI-GO-GO order had an overall satisfaction rate of 100%.
Meet the artisans

**Martha Kimani, 40 years old**

I am a mother of two boys and one girl. During MIMCO INDI-GO-GO order both of my boys were sick and in need of better medical attention. Even though I had not yet received the income, I was confident to borrow money which I used to pay their hospital bills.

**Mary Joseph, 35 years old**

I am a foster mother of one. I worked on MIMCO INDI-GO-GO as a stitcher. I used the tie and dyed leather imported from Ethiopia in construction of the bags. Given that the material was not locally sourced I strived to make quality perfect bags. I gained more experience working on the order.

**Angeline Kalondu, 38 years old**

I am a mother of two. I worked on MIMCO INDI-GO-GO order as a beader. The order came at a time my family was experiencing some economic challenges. I used the income from the order to buy enough of food stuff in preparation for scarcity usually experienced during elections (early August 2017).

**Asumpta Kanini, 32 years’ old**

I am a mother of two. I am an embroiderer however I worked on MIMCO INDI-GO-GO as a stitcher. I used the income from the order to pay school fees, feed my family and to pay rent.
Conclusion

MIMCO’s INDI-GO-GO order was performed in very unstable economic times characterised by high inflation, scarcity of essential commodities especially food and politically instigated uncertainties. The tough externalities did not dampen the spirit of the artisans but invigorated their determination to respond to their needs. Qualitative findings indicate that one of the most desired need by the artisans was social cohesion in a divisive political environment. The MIMCO work provided income to artisans and provided an opportunity for positive interaction and ability to tolerate one another’s divergent political opinion.

The MIMCO INDI-GO-GO order provided good work for the artisans which leveraged strong livelihood in terms of skill development and fair treatment in their workplace. Despite the limited access to essential food and services in the period of the order, the artisans still improved their social well being and standards of living.

More about the Ethical Fashion Initiative:

The Ethical Fashion Initiative (EFI) is a flagship programme of the International Trade Centre, a joint agency of the United Nations and the World Trade Organization. EFI reduces global poverty by linking micro-producers and artisans to the international supply chain of fashion, facilitating dignified work at a fair wage. By collaborating with social enterprises, the EFI supports local creativity, female employment and empowerment and gender equality. Ultimately, this aims to reduce extreme poverty and increase the export capacities of the region in which it operates.

About: ARTISAN FASHION EPZ Ltd

ARTISAN FASHION is a social enterprise that was established in 2005 to connect Africa’s artisans to esteemed luxury brands all over the world. They are the first African production company to successfully combine artisan creativity and production capability with a careful consideration for traceable social impact. Acting both as a production hub and a disseminator of work, they employ Kenyan artisans in their hub and collaborate with 17 artisan communities across Kenya to produce hand crafted materials and artefacts made with traditional skills.
